iKnow

by *The iCount Method*[®]

Nothing succeeds like success. What is the success of The iCount Method[®]? Understanding the needs of both our teachers and students and anticipating future needs and growth potential.....

.....and that is how iKnow by The iCount Method[®], was launched.

With all the different levels of The iCount Method[®], Mrs. Cweiber realized there is still room for more success- a program geared to.... well, we will let you see our latest series for yourself- the gorgeous colors, bigger fonts and fabulous graphics- and you will immediately understand who will be amazed and who will shout- "I Know!!" Now even more students can shout- "I Count!!" and "I Know!!!" -

If your students will better thrive with a shorter format, ask to see our many sample chapters of iKnow by The iCount Method[®] series.

Presenting the first book of the iKnow by The iCount Method[®] series:

The iKnow by iCount Method[®] Pink Edition
which is the **Pre-1-A Preschool Package**

ISBN #978-1-957527-13-0
Only \$19.99 per student

ABOUT THE iCOUNT METHOD® AND THE iKNOW BY THE iCOUNT METHOD®

After teaching both students and fellow teachers for many years, Shoshie Cweiber was determined to find a better way of teaching math- for both the student and the teacher. Using her years of experience, much research and perfecting her model, in 2010, The iCount Method® became a reality.

At first, The iCount Method® was a series of workshops that taught teachers how to teach math successfully using a clear and easy format for teachers to follow. Principals and teachers asked for textbooks that would help them implement The iCount Method® in their classrooms. The iCount Method® series of math workbooks, math fluency books, math readiness and a myriad of other successful tools to help students succeed in math were then created.

The iCount Method® used in these books and tools is a unique method of building a student's deeper understanding of procedural fluency. It goes beyond memorizing and just applying procedures without the student really having an understanding of the concepts. Instead of teaching math by rote, it is centered on comprehension-based strategies that explain the how and why of mathematics at every level- from basic to advanced, one simple step at a time. This system flows from the concrete to the semi-concrete to the abstract, using real life scenarios, manipulatives, storytelling, logic and FUN. Students easily see the usefulness and clarity of math because it is taught with real-life situations. This helps them grasp the complex concepts in the core curriculum.

To ensure continued success, a new program, iKnow by The iCount Method® has been launched. Ideal for schools that have a time constraint on their math lessons or who would better thrive with a simplified curriculum, the iKnow by The iCount Method® series guarantees positive achievement.

The iCount Method® is now used in over 200 schools throughout the United States. Teachers love teaching, parents enjoy reviewing, and most important- students love learning math.

ABOUT SHOSHIE CWEIBER, MS SP ED, Creator and Publisher of The iCount Method® and The iKnow by The iCount Method®

The success of The iCount Method® and The iKnow by The iCount Method® is based and built on much experience and hard work. As of this date, Shoshie Cweiber has more than 20 years of experience as a mathematics specialist and educator. This experience includes but is not limited to writing over 125 iCount Method® math books, teaching math to both students and teachers in general and special education settings, workshops, training sessions, and creating professional development resources for both teachers and principals.

As a professor at Daemen College, Shoshie Cweiber continues to educate a new generation of teachers while developing and testing new ideas and materials for The iCount Method® and The iKnow by The iCount Method®. This ensures that The iCount Method® and The iKnow by The iCount Method® will continue perfecting its quest for excellence in teaching math.

Dear Educator,

The iCount Method® is proud to present to you our series of math workbooks, fluency books, posters, CD's, and other learning tools. Each has a proven record of building a solid math foundation for our students continuing throughout their elementary education.

The iCount Method® provides a strong number sense, a knowledge of how to reason with numbers and the ability to make sense of math. **The iCount Method®** provides a three-pronged approach for each math lesson, including but not limited to

A. Number Sense Activity *Gives children the ability to use and understand numbers*

B. Math Fluency Activity *Teaches tools to perform problems accurately and quickly*

C. Make Every Math Lesson Count! *Detailed steps on how to teach the lesson of the day. These worksheets make the math real for all students.*

D. Monitor Progress *The iCount Method® includes an evaluation sheet to monitor the student's progress in comparison to him/herself as well as in comparison to the entire class.*

Many books presented in this pamphlet are all-inclusive **Comprehensive Grade Curriculums**. By investing in **The iCount Method®**, you can be assured that your students will have the foundation and the math concepts necessary for that grade and future grades going forward.

Please review the many options and packages of math books, teaching workbooks, and additional worksheets available to ensure your students will learn and excel. Call us today to discuss which packages will best suit your students' needs.

THE CUSTOM CLASSIC LINE

The **Custom Classic Line** is one of The iCount Method's® latest line of workbooks for grades one and two. With over 200 schools in The iCount Method® family, we are proud to boast that we have been able to “custom-make” this group of books because principals listened to teachers, and The iCount Method® incorporated the many ideas reviewed with the principals in our new tailor-made series. This series includes all the necessary tools and strategies made famous by The iCount Method® but it has additional information to make it more “custom.” Another success story brought to you by The iCount Method®.

LETTERS OF RECOMMENDATION

I am a third grade teacher in Monsey. I would like to let you know how much I appreciate your math program. We were using another program but when you published your new third grade workbook, we of course ordered it. Until this new school year, I can't begin to tell you what a hard time I had coming up with a clear and concrete Math practice for my students. I used to spend half of the lesson just explaining the directions to them. The iCount Method changed everything. Everything seems much clearer to my students. It's actually the first year that my students understand what to do in the book without any help. I especially love the fact that there's a Word Problem lesson at the end of each chapter.

Thanks for giving me the opportunity to help my students grow in Math.

Dear Mrs. Cweiber,

It has been an absolute pleasure to work with you in building the critical foundations of Mathematics using your remarkable I-Count curriculum and methodology. Our school mission includes the desire to help each and every student reach her fullest potential, in a warm, nurturing and supportive environment. We strive to provide our students with, or lead them toward, the resources or support they may need when necessary, so that every girl can succeed. You, Mrs. Cweiber, have proven to be a most worthy and competent partner in these efforts!

Throughout the past two years, I have been most impressed with the quality, creativity, sheer talent and professionalism which is apparent in every aspect of the iCount Math curriculum. Math instruction, especially in the early elementary school years, is so critical, and needs to be done properly, in order to establish the foundational Math skills which students will always continue to build upon. Clearly, a tremendous amount of effort and research has been expended in creating a superb and masterful curriculum, which is beautifully organized, has visual appeal and is easy to use. I am extremely satisfied with The iCount Math and I look forward to continue utilizing your services as we work together to meet the needs of our students.

Sincerely,
General Studies Principal

My teacher is moving through the first grade red book and is absolutely loving it!!!!!! The iCount Method is helping all our students, on every level, succeed in math!! It is a pleasure to use!!

General Studies
Principal

We will be happy to supply you with the contact information of the teachers/principals/curriculum directors who wrote these letters of recommendation.
